

We talk about freedom for other countries while the freedom of this country, which many lives were losted fighting to put them into law is being slowly eroded through the greed and ignorance of the few who have a fear over losing the tight grip of power they hold so dear. This is the 21st century and we should be more advanced in all areas of our lives. Satellite radio is one of those advancements of this century. XM Radio provides a great service to me. At home and on the road. It is good to know the weather and traffic that is up to date when traveling to other cities. To do away with this service what is next? I choose XM Radio for the service it provides me like so many others. I respectfully ask you to reject NAB's petition 04-160  
Thank YOU
